

Key Lock **Standard**

Suffix - K

Our standard lock for all locker units purchased, unless stated otherwise. This simple locking system is ideal for both multiple users or single, long-term use.

Two keys are supplied per lock.
Key series can be mastered at extra cost

Master Key Available

Coin Lock

Suffix - C

This sliding bolt locking system is secured with the use of a £1 coin or trolley token.

This simple lock is ideal for temporary use in dry environments such as public buildings, shopping centres or educational facilities.

Master Key Available

View inside the door

Round Mechanical Lock

Suffix - KL10 - Private Use Only

This compact black mechanical lock is suited best for users that prefer not to use or keep a key. This lock has a private function only, meaning a set code will be used repeatedly, ideal for places of work.

If a code has been forgotten it can be recovered using a code retrieval key *sold separately*

Code Retrieval Key Available

Rectangular Mechanical Lock

Suffix - KL20 - Private Use Only

This flush black mechanical lock is suited best for users that prefer not to use or keep a key. This lock has a private function only, meaning a set code will be used repeatedly. Ideal for places of work. The coloured window shows when the lock is in use and the dials auto-scramble to 0-0-0-0 to hide the code for convenience after use.

If a code has been forgotten it can be recovered using a master key *sold separately*

Master Key Available

Value Mechanical Lock

Suffix - KL15 - Private Use

This cost-effective black mechanical lock is suited best for users that prefer not to use or keep a card or key. This lock has a private function where the user sets a code for repeated use, with a reset switch to change the code while the door is open. *Public use lock available upon request*; this lets the user set a four pin code only once before being erased once opened for the next user. This is ideal for places that requires multiple use.

The coloured window shows when the lock is open or in use. If a code has been forgotten it can be recovered using a master key *sold separately*

Code Retrieval Key Available

'Private Use' lock shown above.

Digital Lock

Suffix - D - Private/Public Use

This keyless digital lock comes in choices of silver or black. Its two functions can be changed to suit its user.

The (default) private function is for users to set a pin code for repeated use, making it ideal for places of work. The public function allows users to set a four digit pin code which is used only once before being erased once opened, then it is available for the next user.

2 x AAA batteries are initially supplied but then to be personally replaced

Electronic Keypad Lock

Suffix - KLKP

This stylish standalone lock shares the same slimline design that the RFID Plate Lock has, while preserving the traditional code access keypad often visually favoured. This can be set to either private or public use.

A personal master code should be set up at the first point of use meaning if the users code has been forgotten it can still be recovered.

4 x AA batteries are initially supplied but then to be personally replaced

Lock (on the right) shown with programmer

RFID Plate Lock

Suffix - KL RFID

This stylish RFID front plate lock is designed to be opened with a card and can be programmed for either private or public use.

One card programmer device is required per order, weather that is for one lock or one thousand locks.

Featuring a power latch enabling intuitive 'push shut' closing system for fast locking doors.

Each lock comes with one card however additional cards can purchased separately.

4 x AA batteries are initially supplied but then to be personally replaced
