

Perimeter is a fitted product it is designed to be built against a flat wall.

Perimeter

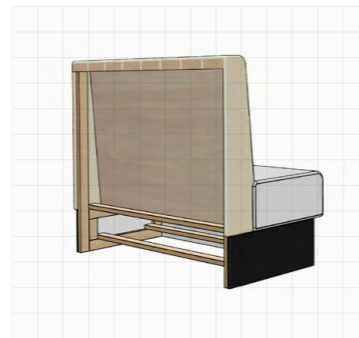

Fixed Seating

Perimeter is a fixed seating solution which is specified on a completely bespoke specification; it is tailored to each individual project and can be made to go around curved walls and columns if necessary.

It's constructed from a solid wooden frame and 90mm thick foam seat. It has three different back rest detailing to choose from as standard; Plain, fluted

and buttoned. All upholstery is totally bespoke so fabrics, leathers or vinyl's can all be selected. All finished off with a black laminate base.

The rear of the Perimeter is open as shown in the image on the right, this means it can be designed to not obstruct power sockets in the walls and can be shaped easier if necessary.
