

PERIMETER

Perimeter is a fixed seating solution which is specific on a linear meter basis; it is tailored to each individual project and can be made to go around even curved walls and columns if necessary.

Perimeter can be made into booths of any size to create personal spaces, even in the smallest rooms. They can fill the lengths of the walls, even the largest of rooms. With the open backs, it allows the seats to be scribed around skirting boards, cable trunking and any major

parts of the building. Power sockets can be added to the base of the Perimeter if necessary so that any sockets on the walls need not be unused.

Perimeter is constructed with a solid wooden frame and 90mm thick foam. It has three different backrest details to choose from as standard; Upholstery is totally bespoke, so fabrics, leathers or vinyl's can be selected to personal preference. All finished with a black laminate base.

STANDARD FEATURES

The main carcass construction varies from solid wood and plywood for strength and rigidity.
Covered in multi density foam to soften the angles.
Fully upholstered in a material of your choosing.
The laminate base has an MDF (Medium Density Fibreboard) core.

DESIGN By Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us. personal taste.

They come from all over the world, but are based in our Design Centre located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test centre and prototyping lab.

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle - **Reduce, Reuse and Recycle.**

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling.**

Reduce Reuse Recycle
