

# Poval

## Concealed Pod

Our newly added Poval Pod has been shaped as an oval with a small opening; meaning it can feel a lot more concealed and a lot more secure as the walls shroud the user from most angles.

Poval Pods are supplied with a table that is fitted at one end to the wall with a bracket, then supported with a steel leg at the other end. The table is made using Senator standard MFC.

They are also supplied with a power module that has 2 x power, 1 x USB A and 1 x USB C components.

Poval Pods are 1500mm deep, 2125mm high and a grand 2500mm wide as standard.

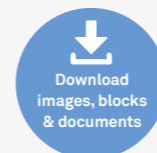

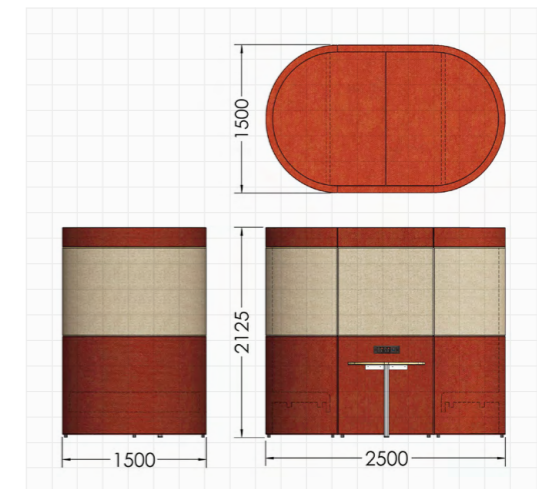

The roof is also fitted with four PIR activated downlights, meaning the light will activate with movement and can be modified to suit.

Poval Pods are fitted with in-surface power on the rear wall which includes 2x power sockets, USB A & USB C components.

Purchase of Poval Pods include delivery and installation during normal working hours.
