The Solutions Are Endless

Our storage wall offers the scope to create efficient storage solutions in any office environment.

Functional, efficient and adaptable, it grows with your business. Specified at the start of a new build or during an office refurbishment, it can be reused over and over again. Additional modules can be bolted on to the system, creating organic growth and adaption for your office environment as you need it.

Individually designed to fit from floor to ceiling and from wall to wall, maximising the space in any given room. The simple yet robust construction offers strength, stability and durability. And because all units are made to your specifications in our factory, you'll enjoy the minimum of disruption.

With a range of different unit styles, our storage wall integrates seamlessly with the space around it. Allowing flexible configurations, it can also grow, adapt or even relocate as your requirements change. As well as offering efficient storage, units can also be designed to accommodate multimedia presentation facilities for a truly clutter-free working environment.

ONE SIZE DOES NOT FIT ALL.

Combining innovative design with clever construction, our lockers allows every last bit of valuable office space to be used to its full potential as personal storage.

This enables you to create a unique and flexible working environment whilst maximising all available floor space. Whether used as freestanding units to divide a room, or against existing walls, it offers a solution for every situation.

‘Design must be functional and functionality must be translated into visual aesthetics without any reliance on gimmicks that have to be explained.’

- Ferdinand Porsche

Specifications & Features

Functional and efficient storage is a necessity for the modern working environment: and for our storage wall, this is just the starting point. In addition, we can work with you to create bespoke solutions that meet your every need.

Features

- Services are easily accommodated both vertically and horizontally through the system.
- Locks have removable barrels to make office moves simpler.
- Locks can be suited and master keyed.
- 180° single pivot high performance exposed knuckle hinges.
- Totally relocatable and reusable.
- 'Burst-resistant' shelf supports.

Construction

- 18mm Graphite internal carcass.
- 18mm decorative external panels with matching 2mm impact resistant edging.
- 18mm structural back panel to form a rigid and stable structure.
- Four heavy duty levelling load bearers on each module.
- Soft hermetic seal joint between doors and carcass.
- All cabinet fittings are heavy duty, high performance and corrosion protected.
- All base structural shelves have an additional load bearing support foot.

Dimensions

- Widths of 1200, 1000, 800, 600, 500 and 400mm
- Depth 500mm standard - 400mm and 600mm are options available.
- Capped heights on request.
- Floor to ceiling height up to 3150mm accommodated comfortably.

Doors & External Panel Finishes

- Standard MFC finishes are:

Cupboard Fronts

- Units come as standard with full height locking doors, also available are split doors, top box doors, drawer fronts (to waist height) and open fronted.

Finishes and Filler Panels

- Décor end cloaking panels for exposed ends.
- Scribing panels to abut walls.
- Column and pillar cladding panels.
