

Senstor

Storage Solution

Our Senstor range offers the scope to create and specify an efficient storage solution within any commercial environment.

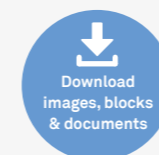

Functional, economical and robust, sensor by design is engineered to meet the demands of our ever changing workplace surroundings.

Specified within the initial design concept of a new build programme or during an office refurbishment; by the very nature of its design can be reused or reconfigured over and over again. As a business evolves or remoulds modules can be added or reconfigured, in turn it can create a vast array of space and storage permutations providing a flexible, efficient and adaptive storage solution.
