

## SOLITUDE POD

The Solitude Pod was one of our original single person pods.

This upholstered shaped pod was designed for standing and setting up for temporary work. With fully upholstered curved edges, it helps with acoustic absorption at times when a conversation need more serenity.

Solitude Pods are supplied with a wave-shaped table that is fitted to the walls, and is constructed using 18mm Senator standard MFC.

It has a circular pixel power module (1x power and 1x USB) positioned under the table top. However unlike all our other pods, Solitude does not have overhead lighting.

Our Solitude Pods are 800mm deep, 2120mm high and a comfortable 1000mm wide as standard.

## DESIGN By Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us. personal taste.

They come from all over the world, but are based in our Design Centre located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test centre and prototyping lab.

## STANDARD FEATURES

With a clever interlocking frame, the main carcass construction varies from 12-18mm plywood for strength and rigidity. Filler material like 11mm OSB and 6mm MDF helps to make these frames lighter and easier to move. Covered in multi density foam to soften the angles. Fully upholstered in a material of your choosing. 18mm thick shaped MFC table and support with 2mm ABS edging. Completed with adjustable feet.

### Material Content

Components are constructed of the following

Plywood

Solid Board

OSB Board

PU Foam

Fabric

Steel

MFC

### Recycled Content

Contains up to 1.40% of Recycled Material

Recycled Content (% By Weight)

### Recyclability

The range is 99% recyclable

# 99%

## SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

**-Reduce, Reuse and Recycle.**

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

# Reduce Reuse Recycle
